Sector-26, Chandigarh

**Subject:** - Condition Assessment and stability certificate.

**Reference:** Your letter no SJHS/2023-24/6613 Dated 14.09.2023

As per the site inspection and test results of Non - Destructive testing results of **St. John's High School**, Sector-26, Chandigarh. The following conclusions are drawn:

- The average relative strength of concrete varies from 15-20 N/mm<sup>2</sup> corresponding to the rebound hammer test.
- The general overall quality of the concrete is in good condition corresponding to the Ultra sonic Pulse Velocity test.
- The load-carrying capacity of the slab and beams can be calculated based on concrete grade **M-20**.
- The design of the current building complies with the criteria of the IS Code at the time it was built.
- The occupied building, with respect to stability, was found to be in good condition, as the overall quality of the concrete is good at the locations where tests were conducted. No signs of spalling of concrete or distress were observed in the building.
- This certificate is valid for a period of 3 years from the date of issue.
