

PROJECTED SYLLABUS - 2026-27

English - Class VII

LEARNING OBJECTIVES:

- To develop comprehensive language skills, critical thinking, cultural awareness, and creative expression through engagement with prose, poetry, and stories.
- To improve reading comprehension, vocabulary, and grammar, enhancing analytical and creative writing abilities, fostering an appreciation for literature, and developing effective communication skills in both spoken and written forms.
- To understand and analyse different text types like stories, poems, articles, and factual passages. Identify main ideas, supporting details, and author's purpose.
- Infer meaning from context and make logical deductions.
- To organize ideas coherently and effectively and compose clear and well-structured writing tasks with proper grammar and punctuation.
- To reinforce basic grammar concepts like tenses, subject-verb agreement, parts of speech, sentence structure and apply grammatical rules accurately in writing and speaking.
- To identify literary devices like metaphors, similes, alliteration etc.
- To evaluate different perspectives and interpretations and integrate with real-life situations.

SYLLABUS PLAN FOR THE SESSION 2026-27

CLASS: 7

SUBJECT: MATHS

LEARNING OBJECTIVES

GANITA PRAKASH (PART I)

Ch 1.Large Numbers Around Us:

Understanding the magnitude and significance of large numbers.
Place value and face value of digits in large numbers.
Comparing, rounding off, and using large numbers in real-life situations.
Learning the Indian and international number systems.
Exploring patterns in multiplication with 10, 100, and 1000.

Ch 2.Arithmetic Expressions:

Introduction to arithmetic expressions, terms, coefficients, and constants.
Performing operations (addition, subtraction, multiplication, division) on expressions.
Simplifying and evaluating arithmetic expressions.
Geometry:

Ch 3. A Peek Beyond the Point:

Understanding points, lines, and planes.
Identifying and measuring angles using a protractor.
Constructing angles and triangles.
Exploring types of angles and their properties.

Ch 4.Expressions Using Letter-Numbers:

Introduction to algebraic expressions using letters and numbers
Understanding variables and constants
Combining like terms and simplifying expressions, and
Solving simple equations.

Ch5.Parallel and Intersecting Lines

Understanding the properties of parallel lines and transversals.
Applications of parallel and intersecting lines in geometric problems.

Ch6.Number Play:

Exploring patterns in numbers,
Understanding prime and composite numbers,
Learning divisibility rules and their applications, and
Solving number puzzles and games.

Ch 7. A Tale of Three Intersecting Lines

Identify and understand medians, altitudes, and bisectors of a triangle
Recognize and apply the concept of triangles
Solve geometric problems involving intersecting lines

Ch 8. Working with Fractions

Focuses on mastering multiplication and division of fractions,
Simplifying to the lowest form, and
Solving real-world problems.

GANITA PRAKASH (PART II)

Chapter 1. Geometric Twins

Recognizing, defining, and creating congruent shapes (twins),
Understanding their orientation, and
Applying congruence criteria to triangles in 2D and 3D.

Chapter 2. Operations with Integers

To enable students to add, subtract, multiply, and divide integers, including negative numbers, using models like tokens and number lines.
Students will learn to apply properties (commutative, associative, distributive) and solve real-life

Chapter 3. Finding Common Ground

Focuses on mastering factors, multiples, Highest Common Factor (HCF), and Lowest Common Multiple (LCM) through conceptual understanding rather than rote memorization.
Students learn to identify common, prime factors, and use prime factorization to solve real-world problems involving shared, maximum, or minimum quantities.

Chapter 4. Another Peek Beyond the Point

Focus on mastering multiplication and division of decimals,
Converting fractions to decimals,
Understanding decimal place value up to thousandths, and applying these to measurements

Chapter 5. Connecting the Dots

Focus on analyzing data sets,
Understanding average,
Identifying data range, and
Interpreting data distributions.

Chapter 6. Constructions and Tilings

Constructing perpendicular bisectors,
Understanding angle relationships for shape creation,
Creating tessellations (tilings) without gaps, and exploring symmetry

Chapter 7. Finding the Unknown

To develop proficiency in balancing equations,
Utilizing inverse operations (addition, subtraction, multiplication, division), and
Substituting values to check solutions

General Objectives:

Developing mathematical thinking and problem-solving skills.
Applying mathematical concepts to real-life situations.
Encouraging exploration, collaboration, and logical reasoning.
Building confidence in using mathematical concepts.

CLASS: 7

SUBJECT: SCIENCE

LEARNING OUTCOMES: Students will be able to

differentiate between materials, objects, organisms, phenomena, and processes, based on, properties and characteristics, such as, autotrophic and heterotrophic nutrition, acidic, basic, and neutral salts using different indicators, real and virtual images, etc

classify materials, objects, organisms, phenomena, and processes, based on properties and characteristics, such as, metals and non-metals, acid and bases based on their physical and chemical properties

plan and conduct investigations and experiments to arrive at and verify the facts, principles, phenomena, or to seek answers to queries on their own, such as, investigate conditions necessary for rusting, test the conductivity of various solutions, images formed by plane mirror etc.

relate processes and phenomena with causes and effects, such as, growth of plants with pH of the soil, survival of aquatic life with pH of water, blue colour of sky with scattering of light, etc.

explain processes and phenomena, such as, nutrition in human beings and plants of stars, formation of rainbow, etc.

draw labelled diagrams, flow charts, concept maps, and graphs, such as, digestive, respiratory, systems, etc.

analyse and interpret data, graphs, and figures, such as, distance-time graph

apply scientific concepts in daily life and solving problems, perform exercise to keep in good health, avoid using appliances responsible for ozone layer depletion, apply concept of neutralisation reaction to ease pain in ant bite, etc.

draw conclusion, electric current flowing through a circuit, etc.

make efforts to conserve environment realising the inter- dependency and interrelationship in the biotic and abiotic factors of environment, such as, appreciates and promotes segregation of biodegradable and non-biodegradable wastes, minimise the use of plastics, take appropriate steps to promote sustainable management of resources in day-today life, advocate use of fuels which produce less pollutants, use energy efficient electric devices, use fossil fuels judiciously, etc.
