TENTATIVE SYLLABUS PLAN SESSION 2026-27
CLASS: 8
SUBJECT: MATHEMATICS

LEARNING OUTCOMES:

Students will be able to

- **A Square and A Cube**
  identify perfect squares and perfect cubes, find square roots and cube roots using appropriate methods, apply squares and cubes in problem solving situations.
- **Power Play**
  apply laws of exponents, express numbers in standard form, simplify numerical and algebraic expressions involving powers.
- **A Story of Numbers**
  understand the evolution and extension of number systems.
- **Quadrilaterals**
  classify different types of quadrilaterals, apply angle sum property of polygons, solve problems based on properties of quadrilaterals.
- **Number Play**
  apply divisibility rules, solve problems based on factors and multiples.
- **We Distribute, Yet Things Multiply**
  use their understanding of distributive property in algebraic expressions, expand algebraic expressions using identities, simplify algebraic expressions.
- **Proportional Reasoning – 1**
  identify direct proportion, solve problems based on ratio and percentage, apply unitary method in real life situations.
- **Fractions in Disguise**
  interpret percentages as fractions with denominator 100, convert fractions to percentages and percentages to fractions, compare quantities using percentages, apply equivalence of fractions and percentages and the concept of compounding in real life situations.
- **The Baudhayana–Pythagoras Theorem**
  state and explain the Pythagoras theorem, find unknown sides of a right triangle, apply the theorem in practical problems.
- **Proportional Reasoning – 2**
  identify inverse proportion, solve problems involving direct and inverse variation, apply proportional reasoning in contextual situations.
- **Exploring some Geometric Themes**
  identify geometric patterns and relationships.
- **Tales by Dots and Lines**
  plot points on the Cartesian plane, draw simple graphs, interpret graphical information.
- **Algebra Play**
  factorise algebraic expressions, use algebraic identities in factorisation, solve equations using factorisation method.
- **Area**
  calculate area of polygons, find surface area and volume of solids, solve practical mensuration problems.

CLASS: 8; SUBJECT: SCIENCE

LEARNING OBJECTIVES:

Identify and differentiate: Elements, Compounds and Mixtures, Solute, Solvent and Solutions, Concave and Convex-Mirrors and Lenses, Various Phases of Moon, Mass and Weight, Sexual and Asexual reproduction in plants and animals, Food chain and Food web.

Conduct investigations: Formation of compound from a mixture, solubility of some common substances, pressure exerted by liquid, staining onion peel to observe the cells, conductors and insulators of electricity, electromagnets, factors affecting heating and magnetic effect of current, factors affecting the solubility of a substance, measure mass and volume of an object, laws of reflection.

Explain processes and phenomena: Factors affecting evaporation of water, formation of storms and cyclones, reflection and refraction through plane mirror, spherical mirrors, formation of phases of moon, interdependence of organisms, pressure exerted by solids, liquids, diffusion in states of matter.

Write word equations & use scientific language: Reactions between elements to form compounds.

SYLLABUS PLAN FOR THE SESSION 2026-27
CLASS: 8 SST

LEARNING OBJECTIVES:
Students will be able to:

1. Explain the major historical developments, including colonial expansion, British policies and the Revolt of 1857, and analyse their impact on Indian society.
2. Classify natural resources and explain their distribution, utilisation, conservation and significance for sustainable development.
3. Explain the key features of the Indian Constitution, the role of Parliament and the judiciary, and the importance of democratic institutions.
4. Analyse historical events, contemporary issues and case studies to establish cause-and-effect relationships and draw logical conclusions. Apply Knowledge to Real-Life Situations: Relate concepts of resource conservation, responsible citizenship and democratic participation to everyday life.
5. Develop Geographical Understanding: Locate and identify major continents, oceans, mountains, plateaus, rivers and other significant geographical features on maps.
6. Interpret Geographical Information: Compare map projections, interpret maps and explain the influence of physical features on human activities and settlement patterns.
7. Explain the importance of natural resources, biodiversity and ecosystems, and assess the consequences of their unsustainable use.
8. Describe India's traditional crafts, textiles, literature and knowledge traditions, and recognize their historical and cultural significance.
9. Promote Sustainable Practices: Suggest practical measures for environmental conservation, responsible resource use and the preservation of cultural heritage.
10. Use maps, illustrations, textual evidence and case studies to collect, interpret and present geographical and historical information.
